1 - Choose Medium

Using the buttons on the bottom side of the XSD panel you can:
- view HTML in QXmlEdit,
- export diagram and summary as HTML to a file,
- export diagram and summary as PDF.

2 - Choose Report Type

**Logical**: shows the components with their relationships; it is the default.

**Physical**: if you care about the whole picture; data are denormalized.

3 – For the Brave

Preferences options:
- embed or externalize images,
- use Graphviz as chart engine, but beware: support is still experimental.
